DO YOU SET A GOOD EXAMPLE?

Everyone is important because each of us is
setting an example for others.
Unfortunately, right or wrong, people do
things because they see others do them.
So, without even knowing it, you are making
your work place safer or more hazardous
through the way YOU do things.
By doing your job the safe way, you influence
others to work safely, and in turn they are
passing on their safe habits to others.
Result: total safety.
